

# Why Acoustics Matter and How to Specify them

## RIBA Approved CPD

### Overview

Good acoustics can affect more than just the atmosphere of a room; your health and productivity can be affected by acoustics.

Learn more about what sound and acoustics actually are, why acoustics matter, and an introduction into what you need to consider when specifying acoustics in future projects, in this RIBA-accredited CPD.

### This CPD will cover:

- The difference between sound and noise
- Sound Absorbency Classes and Reverberation
- How acoustic products work
- The effects of poor acoustics on wellbeing, education, healthcare and work
- What to consider when specifying 3D room acoustics

### What we offer

- Morning, lunch or Evening CPDs to suit your practice.
- One of our experienced Project Specification Managers can deliver this CPD in person or virtually.
- Duration - 45 minutes
